

Master of Computer Applications (MCA) in Data Science

2 Years | UGC Entitled Online Degree Program

About the Elective

This two-year Online MCA in Data Science is designed based on the latest industry requirements for individuals interested in using data to drive business decisions and solve complex problems. An Online MCA with a Data Science program builds a foundation with a comprehensive software & computer applications curriculum. The program combines principles and practices of computer science, statistics, and data analysis. It takes a deep dive into data science & analytics techniques, allowing you to develop end-to-end, data-powered software systems. An Online MCA in Data Science intends to create a sound computing foundation and incisive analytical mind to accelerate your career in various industries such as finance, healthcare, retail, and technology.

Elective Highlights:

- | Explore a specialized curriculum designed for your specific field, created by a team of skilled professionals
- | Learn the necessary skills to excel on competitive data science platforms
- | Acquire a deep understanding of important technological tools like SQL, NumPy, Matplotlib, and Python
- | Build a portfolio to display your projects and abilities

Syllabus

Semester I

- Mathematical Foundation for Computer Application
- C Programming and File Handling *
- Operating System and Unix Shell Programming*
- Computer Architecture and Organization
- Data Communication and Computer Networks
- Introduction to Computers & Technology

Semester III

- Application Programming in Python*
- Design and Analysis of Algorithms*
- Statistical Methods in Decision Making
- Data Visualization*
- Introduction to Data Science

Semester II

- Data Structures using C*
- Database Management System*
- Software Engineering
- Java Programming*
- Logic Building and Soft Skills

Semester IV

- IT Project Management
- Artificial Intelligence and Machine Learning*
- SQL for Data Science
- Time Series Analytics*
- Project

Eligibility:

Candidates must hold a BCA/Bachelor's in Computer Science Engineering or an equivalent degree, or a B.Sc./B.Com./B.A. with Mathematics at 10+2 or graduation level (with bridge courses as needed).

Duration:

2 years (4 semesters)

Fee Structure:

Tuition Fees

	Yearly	Total
Indian Students	INR 60,000	INR 1,20,000
International Students	USD 1,000	USD 2,000

Domestic Admissions

Registration Fee	INR 500
Exam Fee Per Year	INR 7,000

SAARC Admissions

Registration Fee	INR 1,000
Exam Fee Per Year	INR 8,500

International Admissions

Registration Fee	USD 10
Exam Fee Per Year	USD 125

Crafting Futures, Inspiring Success!

- UGC Entitled online degree programs
- Eminent educators
- Access to exclusive resources
- Learn anytime, anywhere, and on any device
- Innovative learning methodology
- High-quality global standard education
- Practical learning
- Flexible payment options with zero-cost EMI
- Cutting-edge Learning Management System

Master of Computer Applications (MCA) in Computer Science and Information Technology

2 Years | UGC Entitled Online Degree Program

About the Elective

This two-year Online MCA in Computer Science and IT program is designed based on present-day industry requirements for individuals looking to build or boost their career to managerial and strategic roles in the tech domain. It provides an in-depth knowledge of the latest tools & technologies and their applications in designing & developing Information Technology (IT) centric applications. The projects incorporated in the MCA Computer Science and IT syllabus offer a practical understanding of the domain, which will help the learners solve real-world problems. The MCA Computer Science and IT Elective intends to enhance a learner's technical skills and abilities, thus giving a path to accelerate one's career across key corporate roles in the IT domain.

Elective Highlights:

- | Builds a strong foundation in important computer science and IT areas
- | Offers comprehensive knowledge and practical skills in programming, software engineering, web technologies, and database management systems
- | Hands-on lab tasks that go beyond typical classroom instruction
- | Features a curriculum aligned with industry standards that enhances technical proficiency and professional skills

Syllabus

Semester I

- Mathematical Foundation for Computer Application
- C Programming and File Handling *
- Operating System and Unix Shell Programming*
- Computer Architecture and Organization
- Data Communication and Computer Networks
- Introduction to Computers & Technology

Semester III

- Application Programming in Python*
- Design and Analysis of Algorithms*
- Cryptography and Network Security
- Cloud Infrastructure and Service
- Object Oriented Modelling and Design Pattern

Semester II

- Data Structures using C*
- Database Management System*
- Software Engineering
- Java Programming*
- Logic Building and Soft Skills

Semester IV

- IT Project Management
- C# with ASP. NET
- Introduction to R-Programming
- Internet of Things
- Project

Eligibility:

Candidates must hold a BCA/Bachelor's in Computer Science Engineering or an equivalent degree, or a B.Sc./B.Com./B.A. with Mathematics at 10+2 or graduation level (with bridge courses as needed).

Duration:

2 years (4 semesters)

Fee Structure:

Tuition Fees

	Yearly	Total
Indian Students	INR 60,000	INR 1,20,000
International Students	USD 1,080	USD 2,160

Domestic Admissions

Registration Fee	INR 500
Exam Fee Per Year	INR 3,500

SAARC Admissions

Registration Fee	INR 1,000
Exam Fee Per Year	INR 5,000

International Admissions

Registration Fee	USD 10
Exam Fee Per Year	USD 60
